

## **Sailing into History - Where have I been and what will I leave in my wake?**

[sailingintohistory.org.au/index.php](http://sailingintohistory.org.au/index.php)

Sailing into History. The NSW & ACT Association of Family History Societies 2018 Annual Conference will be held Friday 14 to Sunday 16 September 2018 at the Batemans Bay Soldiers Club.

### **Types of online microfilm**

There are two types of online microfilm: Microfilm that has been indexed and linked to searchable databases with the original record images available on commercial sites. 'Online' microfilm is not linked to a searchable database. You have to scroll through the images as if using a microfilm reel. Indexes may be available and need to be accessed separately. You will find examples at these sites.

[www.findmypast.com.au](http://www.findmypast.com.au)

Findmypast - a commercial family history site with a vast collection of indexed original records.

[www.ancestry.com.au](http://www.ancestry.com.au)

Ancestry.com - a commercial family history site with a vast collection of indexed original records.

[www.records.nsw.gov.au](http://www.records.nsw.gov.au)

State Archives & Records is the NSW Government's archives and records management authority. There is free access to online microfilm of shipping lists 1828-1896 plus a free series of webinars – including *NSW Shipping & Immigration records*

[www.records.nsw.gov.au/archives/webinars](http://www.records.nsw.gov.au/archives/webinars)

[www.nationalarchives.gov.uk](http://www.nationalarchives.gov.uk)

The National Archives, UK government's official archive. Offers access to 80+ online microfilm covering army, navy, air force records, war diaries, convict records, coastguard records, wills and much more. Use this link for access

[www.nationalarchives.gov.uk/records/digital-microfilm.htm](http://www.nationalarchives.gov.uk/records/digital-microfilm.htm)

[www.familysearch.org](http://www.familysearch.org)

FamilySearch is the family history site of The Church of Jesus Christ of Latter-day Saints. It offers free access to the world's largest family history collection. You need to create a free FamilySearch account for access. There are 2290+ collections available with access to online original records, most free but some collections do link to commercial sites such as Findmypast.

### **Newspapers**

[trove.nla.gov.au/newspaper](http://trove.nla.gov.au/newspaper)

Trove Digitised Newspapers offers free access to the full text of 1293+ Australian newspaper titles from 1803 to 1954 (some later).

[www.youtube.com/watch?v=MNbkbPLtejc](http://www.youtube.com/watch?v=MNbkbPLtejc)

Trove is a search engine focusing on Australia and Australians. It is managed by the National Library of Australia. Use Trove Lists to share information. The *Trove Making Lists* short video explains how to create and use lists in Trove. Other videos cover Basis Search, Exploring Zones and Advanced Search.

### **Free home access to subscription databases**

Major libraries subscribe to a wide variety of subscription databases and make them available online for free as eResources. These include:

- Books, eBooks, academic and popular journals, magazines, encyclopaedias, dictionaries, newspapers, business and legal resources
- Historic material - books (c16th+), directories, journals, periodicals, parliamentary papers, newspapers and much more

[www.nla.gov.au/app/eresources/](http://www.nla.gov.au/app/eresources/)

The National Library of Australia eResources page offers free home access to 127+ subscription databases. This free service is available to all residents of Australia. You need a National Library card and you can apply online. The card will be mailed to you. You then use the number on the card and your surname to login using the black box, top right of screen. Click on *Licensed resources* (yellow keys icon) to access an alphabetical list of available databases.

[www2.sl.nsw.gov.au/eresources/](http://www2.sl.nsw.gov.au/eresources/)

State Library New South Wales - eResources offers free home access to 168+ subscription databases. You can use an existing New South Wales public library card or apply online for a State Library of New South Wales card which will be mailed to you.

[www.nla.gov.au/app/eresources/](http://www.nla.gov.au/app/eresources/)

Selected eResources at NLA

- Dublin Castle Records 1798-1926 of the British administration in Ireland pre 1922
- House of Commons Parliamentary Papers 1715-1900
- House of Lords Parliamentary Papers 1800-1910
- Carters Price Guide to Antiques and Collectables
- Health & Wellness Resource Center - 400+ health and medical journals plus more
- Gale Primary Sources offers combined searching of 17 newspaper databases
- PressReader - 7000+ newspapers and magazines in 60 languages from 120+ countries
- Irish Newspaper Archive 1763-present (69 titles)
- Sydney Morning Herald Archives 1955-1995
- The Sydney Morning Herald and The Age (Melbourne) library edition 2006 to current

**Use a family history software program** - they offer

- Easy-to-use tools for organising, documenting and linking people together
- Storage for documents, photos, audio and video
- Comprehensive reports, charts and publishing options including websites and books
- Android and Mac apps for tablets and smartphones

**TIP:** Some programs offer free fully functional versions containing the core features of the program. These include:

[www.ancquest.com](http://www.ancquest.com)

Ancestral Quest - Ancestral Quest Basics is the free version. A Mac version is available.

[www.legacyfamilytree.com](http://www.legacyfamilytree.com)

Legacy Family Tree - The standard edition is free to download.

[www.rootsmagic.com](http://www.rootsmagic.com)

Roots Magic - RootsMagic Essentials is the free version. A Mac version is available.

### **Apps for transferring your database to your smartphone**

[www.telgen.co.uk/families/](http://www.telgen.co.uk/families/)

The Families app by TelGen works with Legacy Family Tree.

[www.telgen.co.uk/gedfamilies/](http://www.telgen.co.uk/gedfamilies/)

The GedFamilies app enables family files in GEDCOM format to be transferred from a PC to your iPhone, iPod Touch, iPad, Android phone or tablet'

### **What is GEDCOM?**

GEDCOM (Genealogical Data Communication) is the standard computer file format used to exchange family history information. All family history software programs can create and export a GEDCOM file. They can also import GEDCOM files. This is how family history information is exchanged between different genealogy applications including online trees.

### **What will I leave in my wake?**

How do I ensure that future generations can access all the painstaking research done over many years, by me, and many other researchers and family members who have generously shared information, documents and photos with me?

### **My Plan**

#### **1. Digitise as much as I can and link all the scanned items to the relevant persons in my family history software program**

[scanspeeder.com/](http://scanspeeder.com/)

ScanSpeeder saves time and effort. It scans multiple photos at once on a flatbed scanner. Splits scanned photos into separate files. Straightens and enhances photos. It scans directly from photo album pages. It saves both archival and sharing quality images. Free trial version available limited to 10 scans. Full version costs \$30.

[play.google.com/store/apps](http://play.google.com/store/apps)

PhotoScan – free app from Google photos. It scans and saves printed photos using your camera phone. It takes multiple images and stitches them together. Glare is removed and quality improved. There is automatic cropping, perspective correction and smart rotation. It is really useful to scan from photos still in a photo album and to scan large framed photos.

#### **2. Label and store the originals in archive quality boxes**

[www.albox.com.au/](http://www.albox.com.au/)

Preview Archival for Albox archival boxes and photo storage.

### **3. Maintain a log of what I have and where it is**

To create a log from your photo file, display the photos file. I use large icons. Right click in the address bar > Copy address > Paste the address in Firefox or Chrome. You will get an index of the file that you can cut and paste that to create a log in a spreadsheet or elsewhere.

### **4. Start writing my own story**

[www.rootsmagic.com/Personal-Historian/](http://www.rootsmagic.com/Personal-Historian/)

I have got the free version of Personal Historian to try. This software helps you write the story of your life or others. It breaks this seemingly monumental task into small, manageable pieces and then reconstructs it into a complete, publishable document.

### **5. Put my family history database online**

[www.tngsitebuilding.com/](http://www.tngsitebuilding.com/)

TNG - The Next Generation of Genealogy Site building allows you manage and display your family tree on your own website without having to generating any static HTML. Information is stored in a database and the pages are created on demand. All you need is a website and TNG which uses GEDCOM Import/Export from your family history program.

### **6. Make provision in my will and estate planning**

My enduring power of attorney makes provision for my digital accounts, digital devices and digital resources. My will details my wishes for the preservation of my family history archive, my digital resources and internet sites.
